

### **ASC Vertical Tab Uncoiler**

With hundreds of units in service feeding Conversion Presses worldwide, ASC Vertical Tabstock Uncoiler (Dereeler/Decoiler) set the standard in the industry.

ASC's Vertical Tabstock Uncoiler are durable, electrically-controlled, self-contained machines designed for supporting and allowing payout of strip material stock from coils stacked vertically (eye-to-the-sky) upon the turntable.

Capacities up to 25,000 lbs (11 metric tonnes) and stack heights up to 72" (1.8M) minimize strip changes and maximize press uptime.
